TOUCHSCREEN MULTI-FUNCTION SWITCH

FEATURES-

- Configurable Touch-Screen Wall Stations are Liquid Crystal Displays (LCD) with touch-screen interfacing. The switch utilizes a high resolution backlit display for easy to read button information.
- Each switch is configurable with up to six buttons per page and up to six pages per switch.
- Multiple button “types” are available including scene buttons, momentary buttons, timer buttons, and toggle buttons. Different button types can be combined for the ultimate in control flexibility.
- Each button can be “labeled” with multiple lines of a user’s defined description for the function of that button.
- Switches are fully integrated with other components of the system to properly display the current state of the lighting in the controlled area. Coordinated control between the switch and other switches or devices in a room is automatically generated through the easy-to-use Windows® based system configuration software.
- All power and communication is done through a low voltage Cat5 daisy-chained cable. No additional cabling or sources of power are required.
- Switches fit into standard 1-G electrical junction boxes (4" Sq. Box with plaster ring or masonry box). Ganging of multiple switches can be done without any special rough-in considerations.
- The required faceplate (not included) is a standard Decora® plate so the plate’s color selection and material type do not need to be determined at time of order. The switch’s brushed aluminum bezel matches any standard electrical plate’s color or finish.
- No engraving is required for the faceplate since all descriptions are displayed on the LCD touch-screen.

SPECIFICATIONS

Mounting Considerations: 1-1/2" Deep 4" Sq. Box with 1-G Ring or 1-G Masonry Box (devices can be ganged together)

Power Supply Voltage: Sourced from Primary or Secondary Branch Cat5 Cable (no external power supply required)

Listings: UL 916 and cUL 916

Ambient Temperature: 60º C (140º F)

Maximum Humidity: 10—90% Non-Condensing
TOUCHSCREEN MULTI-FUNCTION SWITCH

MASTER INTERFACE (MSTR-DVOLT-S2) → LOCAL RELAY MODULE (LRM) → MULTI-FUNCTION SWITCH (SW-TS-M) → TO OTHER PRIMARY DEVICES

SHOWN CONNECTED TO A MASTER INTERFACE SOLUTION
